## Experience

---

### Amazon.com

Prime Air SDE Intern

June 2017 - September 2017

Seattle, WA - USA

- Worked with Principal Research Scientist Ishay Kamon in the Autonomy team.
- Designed and implemented a novel state-of-the-art deep learning approach for a specific computer vision task within the team, outperforming existing models by 10x.
- The project was completed successfully and a full-time Research Scientist return offer was extended.

## Stanford University

January 2017 - June 2017

### Independent Research Project

Stanford, CA - USA

- Worked in the Computer Vision and Geometry Lab (CVGL) and Autonomous Systems Lab (ASL) with Professors Silvio Savarese and Marco Pavone on making reinforcement learning more robust with control theory.
- Tackled the problem of policy transfer in reinforcement learning, applying model-predictive control to provide safety guarantees when transferring a learned policy from one environment to another with different dynamics.

## Stanford University

September 2016 - June 2017

### Research Assistant

Stanford, CA - USA

- Worked in the Stanford Network Analysis Project (SNAP) Lab with Professor Jure Leskovec on analyzing large-scale physical activity data with modern data science methods.
- Efficiently cleaned, preprocessed, and distilled 3 TB of user physical activity data from over 2 million users of a mobile fitness app. Obtained scientific results with data visualization, statistical analyses (such as regressions and confidence metrics), and computational methods (including hierarchical bootstrapping).

## Amazon.com

May 2016 - August 2016

### Prime Air SDE Intern

Seattle, WA - USA

- Worked with former NASA Astronaut Neil Woodward in the Flight Test team.
- Designed and built fault-tolerant, scalable software and hardware to autonomously collect and process relevant flight test data from numerous locations for internal consumption.

## ETH Zurich

May 2015 - August 2015

### Summer Research Intern

Zurich - Switzerland

- Worked with Professor Raffaello D'Andrea in the Institute for Dynamic Systems and Control, specifically the Flying Machine Arena.
- Removed superfluous code from an open source motor controller and implemented new features such as motor calibration, emergency safety states, and a better motor startup routine in C.
- Simulated dynamic motor and propeller system responses in Python.

## Amazon.com

May 2014 - July 2014

### SDE Intern

Seattle, WA - USA

- Worked in the Demand Forecasting team creating a real-time simulation tool. The project was completed successfully and a return offer was extended.
- Worked with Big Data, using the Hadoop MapReduce framework to process large amounts of simulation data generated by a machine learning module.
- Gave a presentation to 100+ Amazon employees regarding my project and its design, implementation, and performance.
